TRAILERS

The Sea-Doo SPARK Move II trailer is so well designed, it can be towed by a compact car even loaded with two Sea-Doo SPARK PWCs!

GETTING THERE IS HALF THE FUN

A watercraft trailer does much more than get your Sea-Doo from your home to the water. Your Sea-Doo is a premium piece of high performance hydrodynamics and should be cradled by something of equal quality, such as a Sea-Doo Move Trailer. The most active Sea-Doo rider may spend 50 days a year on the water. That leaves 315 days, or 8,260+ hours your Sea-Doo is NOT on the water.

The rest of that time your Sea-Doo rests on top of your trailer on its way to the water or back from it, or waiting for the next adventure. Ensure your watercraft is resting on strong, clean roller or carpeted bunks and your trailer's capacity is rated to safely cradle your watercraft load. Owning a quality Sea-Doo Move Trailer will help ensure your next trip to the local ride spot or your 100+ miles family trip is trouble free.

— Willy Carmine,
Route One Motorsports President

Available in galvanized or black painted frame.

SEA-DOO SPARK MOVE II TRAILER

A trailer made specifically for your Sea-Doo SPARK PWC. Weighing 30% less than other Move II models, and 25% shorter, the new Sea-Doo SPARK Move II totally redefines traveling light. You can actually tow it with a standard car since it's under 1,500 lb. even when loaded with two Sea-Doo SPARK units. And it comes pre-calibrated, so you're good to go, from the get-go.

BRP REBUILD CENTER

Built on Tradition. Driven by Excellence.

NUMBER ONE ON THE ENGINE BLOCK

REBUILT PARTS

WE KNOW PARTS LIKE NO ONE ELSE

BRP's commitment to quality and customer satisfaction goes right down to the core. Every rebuilt part that leaves our center meets Rotax's rigorous standards – guaranteed. What's more, we don't compete with our dealer network by selling directly to consumers. Our mission is to help you generate business.

WHERE PARTS COME TO LIFE

Everything about our BRP multi-million dollar remanufacturing centre in Sherbrooke, Quebec is tooled and staffed with one thing in mind – to ensure that Rotax's legendary durability and performance come to life in every BRP-rebuilt short block, crankshaft and cylinder.

HOW WE DO IT?

1. DISASSEMBLY

- Short block components that can be remanufactured to original specs are saved
- All other components are discarded
- Reusable parts are cleaned to remove oil
- Castings are sandblasted
- After further inspection, reusable parts are repainted

2. REMANUFACTURE

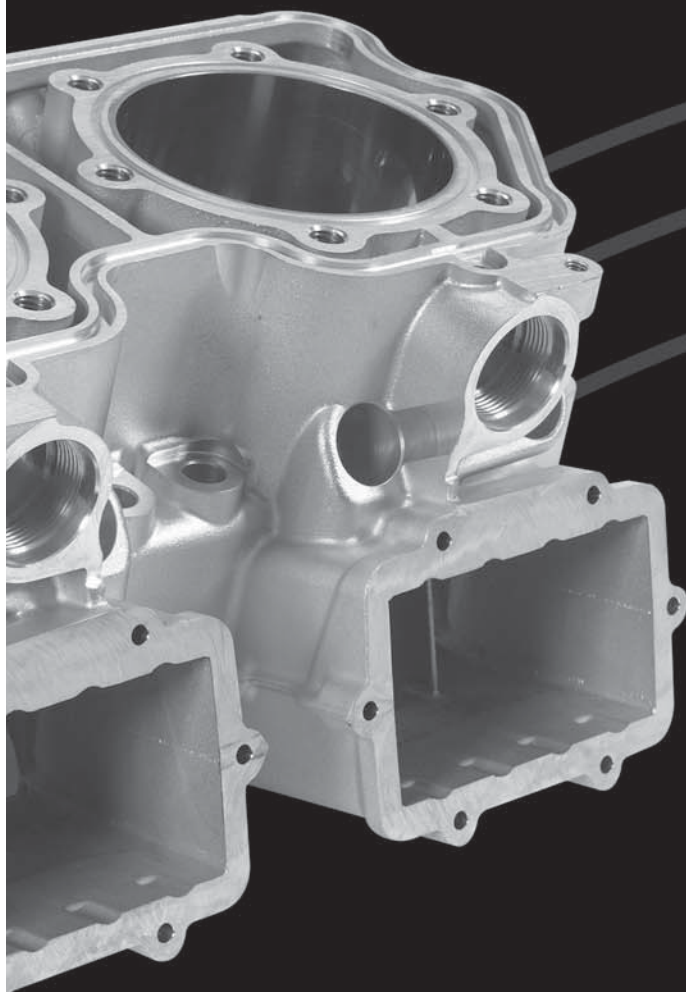

- Nikasil cylinders are replated by Rotax® and piston fit is matched
- For steel-sleeved cylinders, sleeves are replaced with new Rotax parts and line-bored
- Then piston fit is matched
- Crankshaft webs are the only component of the crank even considered for reuse as a rebuilt part
- When a reusable component is not available for replacement, new Rotax parts are used
- Only components that meet our highest standards ever make it past this point

3. REASSEMBLY

- Crankshaft wheels are pressed together with all new Rotax bearings, seals and rod assemblies
- They're balanced and blueprinted to within .001"
- Crankshafts are set, crankcases are sealed and torqued to OEM specifications
- All short block assemblies are completed with new Rotax standard size pistons, rings, bearings and gaskets

4. TESTING & WARRANTY

- After reassembly, all short blocks are run through a battery of tests, including pressure testing
- Our quality-tested and -controlled products are backed by a comprehensive one-year limited warranty that covers parts and labor
- Replacement rebuilt crankshafts and cylinders also have a one-year parts only warranty

CORE SAVINGS

Bring in your cores. They're a critical part of the rebuilding process and could earn you a credit on your parts account. Here's how much you could earn for approved returned cores:

Short blocks	\$700

EASY MONEY WITH SPECIAL CORES*
