PFD Size Guide

Size recommendation:

Your PFD should fit snug around your body while providing comfort.

Your chest width is the key driver to define your PFD size. Measure the circumference of your chest at its widest point. Use our size chart to determine which size is closest to your measurement. If you fall in between two sizes we recommend you choose the smaller one. For safety purposes, a properly sized PFD should fit like a glove, stay in place but allow you to move freely.

How to fit:

When trying on a PFD, loosen all straps, put it on and zip or buckle it up. Afterwards adjust all straps. PFDs have adjustable features to tighten it further around your chest and belly if needed.
