HOW TO MEASURE

For best results, have someone else take measurements. Measure body in swimsuit or undergarments. Tape must be snug but not tight. If measurements fall between two sizes, order the larger size.

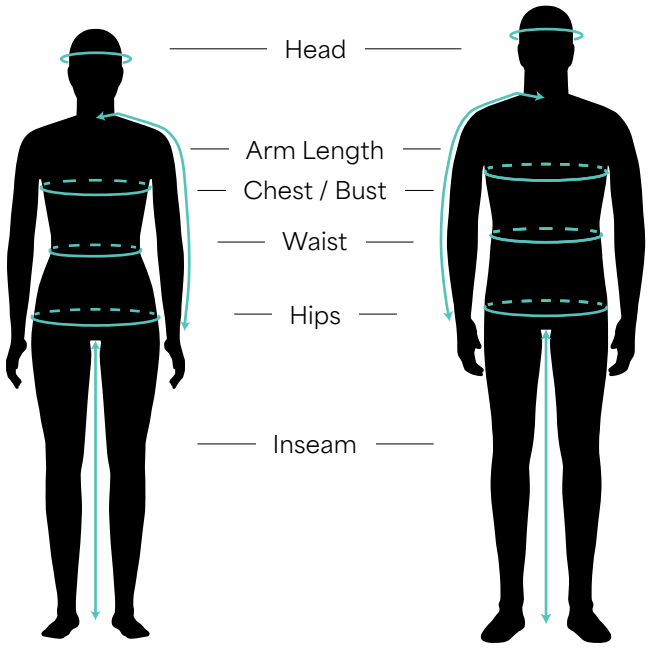

Chest
Measure under your arms, around the fullest part of your chest.

Waist
Measure around your waist at the narrowest place.

Hips
Stand with legs together, measure around the widest part of your hips, ensuring the tape is level.

Arm Length
Let your arms hang down at your sides in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.

Inseam
Without shoes, from crotch to the floor.

What code represents your style?

1. Find your size and color.
2. The corresponding code is THE CODE you use to complete the part number on your order.
